Try to Take Fort Tavannes, But Gain Nothing.

(By Times Special Cable.)

London, March 6.—With the French centre in the Douaumont sector apparently still holding firm against the desperate assaults of the Grown Frince's armice, the German are again turning their attention to the flanks of the French positions around the stronghold.

Intense artillery activity in the Woevre region was reported in the Paris night bulletin, the fire centreing upon the regions of Haude-mont and Fresnes, about ten miles southeast of Verdun. Military commentators recently have laid stress upon the operations in this sector, holding that the next important drive by the Germans might be exerted there, with the object of rolling up the French right

Other indications, however, have pointed to the possibility that the eyes of the German headquarters staff were upon the extreme left, across the Meuse River, where the towering height of Le Mort Romme commands the lesser eminences nearby, and the surrounding plains. The heavy artillery of the Teuton is also pounding the defences in this sector. The French are ready for an infantry attack there, but it is doubted in Paris if the Germans will attempt the storming of the commanding position, to reach, which their troops would have to deploy over a mile wide plain under the destructive

Meanwhile the testing of the French strength by furious as-sailts on the main defences is continuing. Hustrative of this was yesterday's attack on the left of the Douannont sector, near the Cote du Poivre. Here the French lines also hold firm, according to Paris, while in the immediate front of Douannont the German as-saults were temporarily suspended, the heavy French artillery con-tinuing its answer to the rain of giant shells which the Teuton 42's and similar big pieces were pouring upon the defensive trenches.

Unequalled Showing of Spring Hats At Such Moderate Prices as \$4 to \$10

You can buy the originals of these hats in the leading Millinery Shops along Fifth Ave.— AT PRICES FROM DOUBLE TO FIVE TIMES AS MUCH AS OURS.

They are the modes that captured most favor in New York, and the fact that our prices are so extremely low should not imply that the variety is restrict-ed. Quite to the con-trary.

There are small hats and large hats—hats and large hats—hats that are low of crown and marrow of brim. And the trimmings show as profuse a variety as the shapes. Seemingly, flowers come first in point of popularity, while ribboas undoubtedly are immensely modish, and bead ornaments are very chic. -Right House, Second Floor.

in the apartments above. The Fire-chief ordered a hose played on the blaze. His men jumped to obey. Their wagon was empty. The hose was missing.

A missing word is a missing tool. The man who can't express his thoughts can't convey his ideas. If you don't know words, and how to use them, you are as bad off in business or society as a fireman at a fire without a hose. What chance would you stand against the fires of competition if you could neither write nor speak?

You must keep apace with the language to keep up with the world. Education to-day is progressive-not confined to yesterday's languages and activities. War in Europe and new discoveries have brought into general and proper use so many new words that all dictionaries published before this year are wholly out of date.

THE

Devoted to public welfare, campaigning for better education, always seeking to give men and women more opportunities for self-advancement, offers to its readers this new dictionary.

Twenty-five dictionaries in one. Defines words used with special meanings in such activities as war, golf, yachting, music, baseball, etc.
